

EURONET: "European networking in micro- and nanotechnologies - a bridge between East and West"

Casino Hall, Sinaia (Romania), 28 -29 September 2003

The workshop **"EURONET: European networking in micro- and nanotechnologies - a bridge between East and West"** took place in Sinaia, Romania, on 28-29 September 2003. The event was organized by the Romanian Consortium for Nanoscience and Nanotechnology, the National Institute for Microtechnologies (IMT-Bucharest), iMediaSoft Group (France, UK, Romania), with the support of the European Commission and of the Ministry for Education, Research and Youth from Romania. Representatives of the European Commission for priorities 2 and 3

Panel discussion

were invited to talk about the first call from FP6, with a particular emphasis on new instruments and on the results obtained of the candidate countries. Then, some proposals for networks of excellence with Romanian participation (from priority 2, IST: PATENT and AMICOM, from Priority 3. NMP: 4 M, NANOFUN-POLY, POLYSACCARIDES) were presented by coordinators or by contact persons in Romania, followed by other presentations, such as Specific Support Actions related to the field. A panel discussion, with all speakers closed the workshop, which was attended by about 90 participants. They also visited an exhibition and attended demonstrations related to the Nanopolis initiative, presented by iMediaSoft.
