
Enabling Nanoscale Advances

Company description

Park Systems, the world-leading innovator in Atomic Force Microscopy (AFM), enables researchers and engineers around the globe to contribute to impactful science and technological development that helps humanity to grow and improve life standards.

With Park's high-performance scientific instruments for academic and industrial communities, we help to explore new phenomena in chemistry, materials, physics, life sciences, semiconductor, and data storage industries. Cutting-edge AFM automation and the highest data accuracy enables to become more efficient, more accurate and more productive at your work.

With the in-built robotics and AI features of the newly introduced FX40 Automatic AFM, Park Systems has opened the door to quantitative high-resolution imaging for interdisciplinary researchers and industry engineers.
